

Professional Summary

Senior AI Engineer with 4.3 years of experience building enterprise-scale GenAI and multi-agent systems. Skilled in end-to-end design, optimization, and deployment of LLM-powered automation with a strong focus on governance and scalability.

Professional Experience

Infosys — Senior Data Scientist / AI Engineer

Dec 2024 – Present

- Led digital transformation for a Tier-1 telecom by designing full-stack agentic workflows; improved process efficiency **40%** and helped secure a **\$300M** AI-led transformation deal.
- Architected a production **16-agent** pipeline with **5** HITL checkpoints, delivering **95%** straight-through automation across complex enterprise workflows.
- Spearheaded an internal agentic platform that standardized blueprints and governance, **cutting build time 50%** and driving **4×** developer adoption over two quarters.
- Built an LLM “compiler” (prompt planning/optimization + caching + tool orchestration) that **reduced median latency 35%** while maintaining quality.
- Delivered contract-comparison agents for **5** enterprise clients, **reducing manual review time 60%** and improving auditability.
- Owned end-to-end delivery: assessed as-is workflows, defined data models/base tables, and shipped agents from backend to frontend with evaluation and monitoring.

Xcaliber Infotech — Data Scientist

Dec 2022 – Dec 2024, Pune

- Built a **LLaMA-based text-summarization** service (spaCy, BART, PyTorch) to process OEM comments for inventory-delivery waivers; exposed it as a secure API and integrated with internal apps, improving warehouse efficiency and charge management.
- Developed and deployed an **LLM-powered chatbot** (Hugging Face Transformers, LangChain, ChromaDB, Flask) for data retrieval and analysis; accelerated stakeholder Q&A and reduced manual lookups.
- Created an API layer to manage and update summarized comments and audit logs; enabled role-based insights from dashboards for operations teams.
- Designed an **Accessory Recommender** that suggests three add-ons using phone-accessory affinity and location-aware inventory; launched a weekly bundle recommendation that **increased sales 25%**.

Concentrix India — Data Analyst

Oct 2015 – Apr 2017, Gurgaon

- Built Python/SQL pipelines and dashboards for operations analytics;
- Performed exploratory analysis and predictive modelling (regression/classification) to support business reporting.

Skills

Programming & Data: Python (NumPy, pandas, Matplotlib, RegEx), SQL, Flask, Git/GitHub, AWS

Machine Learning: Scikit-learn (Linear/Logistic Regression, Decision Trees, Random Forest, KNN, SVM, AdaBoost, K-Means)

Deep Learning: TensorFlow, Keras, PyTorch; ANN, CNN, RNN, LSTM; Encoders/Decoders

NLP & GenAI: NLTK, spaCy, wordcloud, Word2Vec, TF-IDF, NER; Transformers (BERT, RoBERTa, LLaMA); LangChain, ChromaDB, Hugging Face

Education

PG-Diploma in Artificial Intelligence (PGDAI) — CDAC, Pune, 2022

B.Tech — JIET, Jind, 2014
